

NAGENDRA G

Byndoor, India | +91 93533 82525 | nagendragudemane@gmail.com

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience across the Software Development Life Cycle (SDLC), including requirement analysis, design, development, testing, and deployment support. Skilled in Python, Django, REST APIs, and SQL/MySQL, with experience designing data table structures, optimizing queries, and building maintainable backend code for evolving customer requirements. Comfortable working across the full stack, from database design to frontend integration, with a foundation in OOP, DSA, and unit testing.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS, SQL

Frameworks: Django, Django REST Framework, React.js, Bootstrap

Databases: MySQL, MongoDB, SQLite

Core Concepts: SDLC, OOP, Data Structures & Algorithms, REST APIs, CRUD, Query Optimization, Unit Testing

Tools: Git, GitHub, AWS, Redis

EXPERIENCE

Python Full Stack Intern — Dhee Coding Lab

March 2026 – Present

- Execute tasks across multiple phases of the SDLC — requirement analysis, design, development, testing, and deployment support — for Django web applications.
- Design and develop backend features using Python and Django to meet evolving project requirements.
- Write efficient, maintainable code for REST APIs and integrate frontend components with backend services.
- Maintain database table structures and optimize MySQL queries to support application data operations.
- Write and maintain unit tests using pytest, debug application issues, and document changes for the team.

Backend Developer — PavanXDCL Web Application — Project via Dhee Coding Lab internship

- Worked as backend developer in a 6-member team (3 backend, 2 frontend, 1 lead), focused on backend development and frontend-backend integration.
- Developed backend functionality using Python and Django, including views, APIs, and ORM-based data handling.
- Integrated frontend interfaces and forms with the Django backend, handling input validation and error cases.
- Tested complete workflows from UI to database, collaborating with frontend developers during integration and debugging.

Backend Developer Intern — Suprmentr Pvt Ltd

January 2026 – February 2026

- Built and maintained REST APIs using Django REST Framework, including serializers and viewsets.
- Tested and refined API endpoints to ensure reliable data handling and consistent functionality.
- Documented API behavior and reported status updates to support coordination between backend and frontend teams.

PROJECTS

Product Management System — Django, MySQL, HTML/CSS, JavaScript

- Built a database-driven web application to create, view, update, and delete product records.
- Designed data table structures using Django Models and ORM, with ModelForms and validation for CRUD operations in MySQL.
- Implemented authentication and authorization to protect application functionality.

TB Disease Detection in Cattle — Python, Machine Learning, Flask, React.js, OpenCV

- Developed a machine learning-based system to assess tuberculosis risk in cattle using health and exposure parameters.
- Built workflows for data-based risk assessment and real-time monitoring.

Electric Vehicle Recharge Station Finder — Web Development

- Developed a web application to help users locate nearby EV charging stations.
- Implemented filtering and location-based search to improve station discovery.

EDUCATION

B.E. in Artificial Intelligence & Machine Learning (AIML), 2022 – 2026
